

Climate Change and the Implications for People and Poverty

Two Dates:

Monday 5 October 2009, 9am – 5.30pm

Friday 4 December, 9am – 5.30pm

Feedback from previous sessions of this course:

“Very well delivered and brilliant exercises, I really enjoyed it!”

“Very helpful to hear practical experiences”

“Excellent delivery, very participatory, good mix of styles to respond to different learning techniques”

This interactive training course presents an opportunity to examine and debate why climate change is a key issue for international development.

Objectives

- Get an up to date understanding of climate science and current and predicted impacts on poor communities;
- Learn about mechanisms for mitigation;
- Develop your knowledge of practical adaptation techniques through working on case studies;
- Hear from a Practical Action staff member about our adaptation project work in the less developed world;
- Explore roles and motivations of actors in the international climate change negotiation process;
- Examine the links between climate change, poverty and social justice for the poor;
- Work on a range of exercises to explore these issues and take back lessons to inform your own work.

Who's it for?

Anyone interested in climate change, its impacts and the ways in which people are already adapting their lifestyles in the less developed world.

Who are we?

Practical Action is an international NGO working around the world to tackle climate change with adaptation, technology, campaigning and advocacy.

For bookings please email Sophie Peachey at consulting@practicalaction.org.uk or call 01926 634 403. Please also forward to anyone else who may be interested.
